Investment Strategy	<p>Sundaram Income Plus Arbitrage Active FoF (SIPAFOF)</p> <p>SIPAFOF will aim to generate steady income through a combination of investments in equity and debt.</p> <p>The equity component of the fund will aim to generate returns through investment in Arbitrage Funds. Overall investment in arbitrage positions will not exceed 65% of the funds' AUM.</p> <p>The non equity portion of the Fund is proposed to be invested in debt funds comprising a mix of all or any of the following categories of funds like Overnight, Liquid, Ultra Short Duration, Low Duration, Money Market Fund, Short Duration, Medium Duration, Long Duration, Corporate Bond, Dynamic Bond, Credit Risk, Banking & PSU, Gilt and Floater Funds. Selection of debt funds in investing in the debt component of SIPAFOF will be guided by Sundaram AMC's broad investment philosophy governing risk viz. liquidity, Credit and market (interest rate).</p> <p>Broad filters in choosing debt will stipulate among others, that 100% of the underlying debt portfolio of the chosen funds comprise investment grade securities at the time of investment.</p> <p>Initial allocation and alteration in the mix will depend on prevailing market conditions and be guided in a manner to optimize returns and limiting risk.</p> <p>Allocation and management of the mix of funds will be driven by the fund manager's tactical and medium-term views on yields, general market outlook, credit spreads and relative value on the yield curve. The over-riding objective in managing the mix of debt funds will be to optimize risk-return in a manner that helps the fund limit volatility while delivering steady ongoing returns.</p> <p>The combination of low volatility arbitrage investments and investment grade debt securities of varying maturities should help the fund achieve steady overall returns in the medium to long run.</p> <p>Product Differentiation: This is an open ended Hybrid FoF scheme in the Hybrid category by Sundaram Mutual Fund which will be investing in Other Debt and Arbitrage Mutual Funds. We don't have any funds in this category.</p>																																				
Risk Profile	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Statement of Additional Information and Scheme Information Document carefully for details on risk factors before investment.</p>																																				
Risk Mitigation	<p>The Scheme's portfolio broadly comprises Arbitrage and Debt Schemes of Mutual fund. Thus, the mitigation policies applicable to those Arbitrage and Debt Mutual Fund Schemes will be applicable to this Scheme.</p> <p>Risk mitigation measures for portfolio volatility: The fund invests in multiple schemes thereby ensuring greater diversification at the stock, sector and investment style level.</p> <p>Risk mitigation measures for managing liquidity: Reasonable investments are made in money market instruments and / or money market mutual fund schemes for liquidity purposes.</p>

		<p>Basis Risk: The debt allocation of scheme is primarily as a cash management strategy and such strategy returns are expected to reflect the very short-term interest rate hence investment is done in short term debt and money market instruments.</p> <p>Spread Risk: The Scheme may primarily invest the debt portion of the portfolio in short-term debt & money market instruments, units of Liquid and Overnight schemes thereby mitigating the risk of spread expansion which is generally associated with long-term securities</p> <p>Reinvestment Risk: The debt allocation of scheme is primarily as a cash management strategy and such strategy returns are expected to reflect the very short term interest rate hence investment is done in short term debt and money market instruments. Reinvestment risks will be limited to the extent of debt instruments, which will be a very small portion of the overall portfolio value.</p> <p>Liquidity Risk: The Scheme may, however, endeavor to minimize liquidity risk by primarily investing the debt portion of the portfolio in relatively liquid short term debt & money market instruments, units of Liquid and Overnight schemes.</p>
	Repo Transactions	<p>This risk is largely mitigated, as the choice of counterparties is largely restricted and their credit rating is taken into account before entering into such transactions. Also operational risks are lower as such trades are settled on a DVP basis. In the event the counterparty is unable to pay back the money to the scheme as contracted on maturity, the scheme may dispose of the assets (as they have sufficient margin) and the net proceeds may be refunded to the counterparty</p>
	Government securities and Triparty repo on Government securities or treasury bills:	<p>As a member of securities segment and Triparty repo segment, maintenance of sufficient margin is a mandatory requirement. CCIL monitors these on a real time basis and requests the participants to provide sufficient margin to enable the trades etc. Also there are stringent conditions / requirements before registering any participants by CCIL in these segments. Since settlement is guaranteed the loss on this account could be minimal though there could be an opportunity loss.</p>
	Units of mutual fund schemes	<p>Mutual Fund portfolios are generally well diversified and typically endeavor to provide liquidity on a T+1/T+2 basis and aim to mitigate any risks arising out of underlying investments.</p> <p>changes and other relevant factors.</p>

The decision of the Trustee will be final in this regard.

Unit holders opting for the IDCW Option only will be eligible to receive the IDCW. IDCW Transfer Facility (DSO): This option will be available only when the amount payable to the investor's account on the Record Date in a folio is equal to or more than Rs.500/. The distributed income so payable will be automatically swept into the Target Scheme (Open ended schemes) as opted by the unitholder, on the date of realisation of funds in the target scheme (DSO form available in the website HYPERLINK "<https://sundarammutual.com/>"www.sundarammutual.com) after the Record Date at the applicable NAV of the Target Scheme, subject to applicable load and accordingly equivalent units will be allotted in the Target Scheme (Open ended schemes), subject to the terms and conditions of the Target Scheme depending upon whether the investment was registered with or without broker code of the chosen scheme at the applicable NAV.

Benchmark	<p>The scheme would be benchmarked to the 60% Nifty Short Duration Debt A-II Index + 40% Nifty 50 Arbitrage TRI. The composition of the aforesaid benchmark is such that it is most suited for comparing performance of the Scheme.</p> <p>Benchmark Rationale: The benchmark selected aligns with the prescribed policy framework for the composition of the benchmark as outlined in the "Framework for Launching FoF Schemes with Multiple Underlying Funds by SEBI vide circular No. SEBI/HO/IMD/IMD-RAC-1/P/OW/2025/4102/1 dated February 06, 2025. Hence the Scheme's performance will be compared with this Index. The performance will be benchmarked to the Total Returns Variant of the Index.</p> <p>The Trustees reserve the right to change the benchmark in future, in accordance with applicable MF regulations and guidelines if a benchmark better suited to the investment objective of the Scheme is available.</p>

Pursuant to SEBI circular no. SEBI/HO/IMD/DF3/CIR/P/2020/194 dated October 05, 2020, there was a change in nomenclature of Dividend to Income Distribution cum Capital Withdrawal (IDCW) available across all the plans offered by the schemes of the Fund with effect from April 01, 2021. The Finance Act, 2020 abolished income distribution tax and instead introduced taxing of income from mutual fund units in the hands of the unit holders.

General Risk Factors	<ul style="list-style-type: none"> Mutual Funds and securities investments are subject to market risks and there is no assurance or guarantee that the objectives of the Scheme will be achieved

Sundaram Income Plus Arbitrage Active FoF

	<ul style="list-style-type: none"> As with any investment in securities, the NAV of the Units issued under the Scheme can go up or down depending on the factors and forces affecting the capital markets. The NAV may be affected by factors such as market conditions, level of interest rates, market-related factors, trading volumes, settlement periods, transfer procedures, price/interest rate risk, credit risk, government policy, volatility and liquidity in markets, exchange rate, geo-political development, to name a few. Change in Government policy in general and changes in tax benefits applicable to mutual funds may impact the returns to Investors in the Scheme. The tax benefits available under the Scheme is as available under the present taxation laws and subject to relevant conditions. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Investor/Unit holder is advised to consult his/her own professional tax advisor. FATCA imposes tax withholding upto 30% on any payments (including redemption and Income distribution is suffice proceeds) made by the Fund/AMC to a US Person classified as recalcitrant account holder in respect of whom the applicable documentation and reporting requirements are not met. The Scheme at times may receive large number of redemption requests, leading to an asset-liability mismatch and therefore, requiring the investment manager to make a distress sale of the securities leading to realignment of the portfolio and consequently resulting in investment in lower yield instruments As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or restructuring of the Scheme. In view of the above, the Trustee has the right, in its sole discretion, to limit redemptions (including suspending redemptions) under certain circumstances At times, due to the forces and factors affecting the capital market, the Scheme may not be able to invest in securities falling within its investment objective resulting in holding the monies collected by it in cash or cash equivalent or invest the same in other permissible securities / investments amounting to substantial reduction in the earning capability of the Scheme. The Scheme may retain certain investments in cash or cash equivalents for its day-to-day liquidity requirements This is only an illustrative list and not an exhaustive list of risk factors that could affect the NAV, performance and liquidity of the Scheme
Scheme-Specific Risk Factors	<p>Risk associated with Fund of Fund schemes:</p> <ul style="list-style-type: none"> The Scheme's performance will depend upon the performance of the Underlying schemes. Any change in the investment policy or the fundamental attributes of the Underlying Fund in which the Scheme invests may affect the performance of the Scheme. The portfolio disclosure of the Scheme will be largely limited to the particulars of the relevant Underlying Fund and investments by the Scheme in debt and money market instruments. The scheme specific risk factors of the underlying scheme become applicable where a fund of funds invest. Investors who intend to invest in Fund of Funds are required to and are deemed to have read and understood the risk factors of the underlying scheme in which Fund of Funds scheme invest in. Details of the underlying funds would be available in their respective website Dependence on the Investment Managers of the underlying scheme: The success of the underlying scheme depends on the ability of the respective Investment Managers to develop and implement investment strategies that achieve their investment objective. Moreover, subjective decisions made by the Investment Manager may cause an underlying scheme to incur losses or to miss profit opportunities. As the investors are incurring expenditure at both the Fund of Funds level and the scheme into which the Fund of Funds invests, the returns that they may obtain may be materially impacted or may at times be lower than the returns that investors may obtain by directly investing in such schemes. As the Fund of Funds scheme will invest into an underlying scheme, the expense charged being dependent on the structure of the underlying scheme (being different), it may lead to a non- uniform charging of expenses over a period of time The fund of fund scheme may have different returns/performance than the underlying scheme due to various reasons. The return of the Fund of Funds may be adversely impacted by total expense ratio, cash drag, timing and pricing difference between the subscription/redemption in the Fund of Funds v/s underlying scheme, operational and transactional reasons etc. The subscription and redemption in the Fund of Fund scheme is also dependent on the liquidity of the underlying scheme. The illiquidity of the same may affect the performance of the Fund of Fund scheme. Investments in underlying schemes carry risks such as performance of securities, derivative investments, credit rating changes, trading volumes, settlement periods, price/interest rate risk, volatility, and liquidity issues. Risks associated with Arbitrage Schemes: The primary objective of arbitrage schemes is to identify and exploit price discrepancies in various markets. However, price differences may narrow or disappear before the arbitrage opportunity is executed, thus reducing or eliminating potential profits. Security prices are fluctuating and therefore timing discrepancies or delays in executing trades may impact profits. Identification and exploitation of the discrepancies involve uncertainty as the fund managers may not be able to recognize the opportunities or may not be able to take advantage of the same in time. In addition, insufficient liquidity in one or more markets may make it difficult to execute trades at desired prices, impacting the effectiveness of the arbitrage strategy. Errors in trade execution, technology failures, or problems with the trading platform may impact returns. In case the trade is entered with a counterparty rather than an exchange, there is a counterparty risk that the trading partner defaults or fails to honor the trade which may result in a loss. Redemption and Liquidity: High redemption requests and market conditions may cause delays in unit redemptions. Portfolio rebalancing may lead to higher transaction costs and exit loads or redemption charges may impact performance. A Fund Manager managing any one of the Fund of Funds schemes may also be the Fund Manager for any underlying schemes.

Sundaram Income Plus Arbitrage Active FoF

	<ul style="list-style-type: none"> There exists a possibility that the investment policy and/or fundamental attributes of the underlying scheme change over time. In such circumstances, the fund manager will seek to continue remain invested in such underlying scheme as long as it does not challenge the investment strategy of the Scheme. Right to Limit Redemptions: The Trustee, in the general interest of the Unit holders of the Scheme offered in this Document and keeping in view the unforeseen circumstances / unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day. The same shall be in accordance with paragraph 1.12 of the Master Circular. <p>Risk associated with investment in units of mutual funds:</p> <p>The scheme may make investments in units of mutual funds. Investments in schemes of mutual funds are subject to market risks and there is no assurance or guarantee that the objectives of the scheme will be achieved. Further, any investment in mutual funds is also subject to risk factors outlined in the offer document of the mutual fund and an adverse performance of a mutual fund scheme in which the scheme has made investments could adversely impact the scheme's performance and NAV of the scheme.</p> <p>Risks associated with Arbitrage Schemes: The primary objective of arbitrage schemes is to identify and exploit price discrepancies in various markets. However, price differences may narrow or disappear before the arbitrage opportunity is executed, thus reducing or eliminating potential profits. Security prices are fluctuating and therefore timing discrepancies or delays in executing trades may impact profits. Identification and exploitation of the discrepancies involve uncertainty as the fund managers may not be able to recognize the opportunities or may not be able to take advantage of the same in time. In addition, insufficient liquidity in one or more markets may make it difficult to execute trades at desired prices, impacting the effectiveness of the arbitrage strategy.</p> <p>Errors in trade execution, technology failures, or problems with the trading platform may impact returns. In case the trade is entered with a counterparty rather than an exchange, there is a counterparty risk that the trading partner defaults or fails to honor the trade which may result in a loss.</p> <p>Risks associated with Debt/Money Markets Instruments</p> <p>Interest Rate Risk: As with debt/money instruments, changes in interest rate may affect the price of the money market instrument(s) and ultimately Scheme's net asset value. Generally, the prices of instruments increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities fluctuate more in response to such interest rate changes than short-term securities. Indian debt and government securities markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.</p> <p>Credit Risk: Credit risk or Default risk refers to the risk that an issuer of a fixed income security may default (i.e. the issuer will be unable to make timely principal and interest payments on the security). Because of this risk corporate debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of fixed income securities will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.</p> <p>Reinvestment Risk: This risk refers to the difference in the interest rate levels at which cash flows received from the securities in the scheme is reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows are reinvested may be lower than that originally assumed. Risks associated with Segregated Portfolio Investors holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer. Security comprises of segregated portfolio may not realize any value. Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.</p> <p>Risks associated with investing in Securities Segment and Tri-party Repo trade settlement:</p> <p>The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund.</p> <p>Risks associated with transaction in Units through stock exchange(s): In respect of transactions in Units of the Scheme through BSE and / or NSE, allotment and redemption of Units on any Business Day will depend upon the order processing / settlement by BSE and / or NSE and their respective clearing corporations on which the Fund has no control.</p> <p>Risk associated with potential change in Tax structure: This summary of tax implications given in the taxation section (Units and Offer Section III) is based on the current provisions of the applicable tax laws. This information is provided for general purpose only. The current taxation laws may change due to change in the 'Income Tax Act 1961' or any subsequent changes/amendments in Finance Act/Rules/MF Regulations. Any change may entail a higher outgo to the scheme or to the investors by way of securities transaction taxes, fees, taxes etc. thus adversely impacting the scheme and its returns.</p>

Central KYC

Central KYC Registry is a centralized repository of KYC records of customers in the financial sector with uniform KYC norms and inter-usability of the KYC records across the sector with an objective to reduce the burden of producing KYC documents and getting those verified every time when the customer creates a new relationship with a financial entity. KYC means the due diligence procedure prescribed by the Regulator for identifying and verifying the proof of address, proof of identity and compliance with rules, regulations, guidelines and circulars issued by the Regulators or Statutory Authorities under the Prevention of Money Laundering Act, 2002.

The Central Govt. vide notification dt. Nov, 26, 2015 has authorised Central Registry of Securitisation Asset Reconstruction and Security Interest of India (CERSAI) to act as and to perform the functions of the CKYC Registry including receiving, storing, safeguarding and retrieving the KYC records in digital form of a Client. A 14 digit CKYC identification Number (KIN) would be issued as identifier of each client.

As per PMLA (Maintenance of Records) Amendment rules, 2015, Rule 9(IA), every reporting entity shall within three days after the commencement of an account based relationship with an individual, file the electronic copy of the client's KYC records with the Central KYC Registry. Institutions need to upload the common KYC template along with the scanned copy of the certified supporting documents (PoI/PoA), cropped signature and photograph. SEBI vide its circular dated November 10, 2016 has advised all mutual funds to upload the KYC records of all existing customers into the CKYC database.

Since the records are stored digitally, it helps institutions deduplicate data so that they don't need to do KYC of customers multiple times. It helps institutions find out if the client is KYC compliant based on Aadhaar, PAN and other identity proofs. If the KYC details are updated on this platform by one entity, all other institutions get a real time update. Thus, the platform helps firms cut down costs substantially by avoiding multiplicity of registration and data upkeep.

Please note that PAN is mandatory for investing in MF's (Except Micro KYC and other exempted scenarios). If CKYC is done without submission of PAN/Aadhaar, then he/she will have to submit a duly self-certified copy of the PAN card alongwith KIN.

This new KYC form is in line with CKYC form guidelines and requirements and would help to capture all information needed for CKYC as well mandatory requirements for MF. Investors should submit the duly filled form along with supporting documents, particularly, self-certified copy of the PAN Card as a mandatory identity proof. If prospective investor submits old KRA KYC form, which does not have all
