FUND MANAGER UPDATE

A Balanced Foundation: This fund offers the best of both worlds, the stability of large caps and the growth potential of mid caps. It is built for investors who want to stay steady during market swings while still participating in the growth of emerging market leaders.

Navigating Uncertainty: Today's global energy shifts and geopolitical events have made markets choppy. We manage this by focusing on a portfolio valuation of 19.9x and a healthy ROE of 12.7%, ensuring we own quality businesses at palatable valuations.

High Conviction: The portfolio with 50 stocks and a high active share endeavours to place more impactful bets on our top ideas.

CONVICTION SECTORAL POSITIONING

Overweight (O/W)

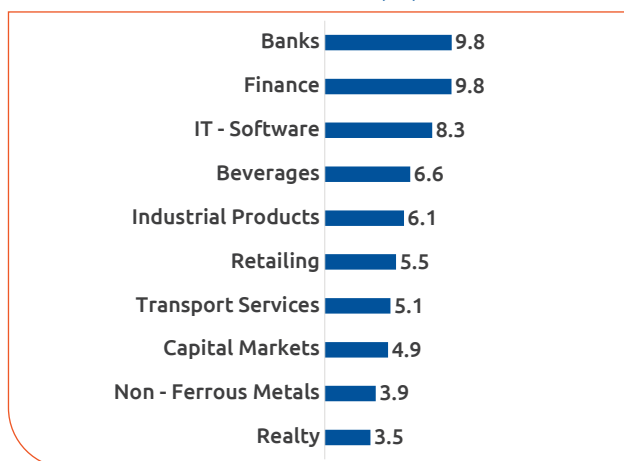

Transport Services, & Consumer Services: We are leaning into these sectors as tailwinds from industry consolidation and improving demand cycle aid medium-term growth. These are the "strong incumbents" that tend to gain scale as the industry cycle picks up.

Financials & Industrials linked to private capex: Improving credit pick-up, adequate capitalization, supportive regulatory environment, and reasonably strong asset quality cycle to help sustain growth for financials over the medium term. Industrial companies leveraging policy support and capex opportunities in emerging segments offer growth with possible upsides as changing world order keeps self-sufficiency and localization under priority.

Underweight (U/W)

Petroleum Products & Banks: In a shifting global environment, we prefer to wait for better entry points and clearer business trends to emerge.

FUND MANAGER OUTLOOK

Focus on providing curated growth portfolio of large caps and mid & small caps:

Maintain a bottom-up approach, staying diversified with an eye on pockets that offer earnings surprises or additional tailwinds.

Prioritize businesses with consistent cash generation and agile management teams capable of medium-term reinvestment.

Pivoting growth during corrective phase of market:

The fund would endeavor to make use of recent market corrections to pivot towards strong growth franchisees available at more reasonable valuations.

Focus would be on rate-of-change and be nimble to lean towards resilient businesses with stronger undercurrents.
