## OBJECTIVE

To invest principally in securities that comprise Nifty 100 Equal Weight Index and subject to tracking errors endeavour to attain results commensurate with the Nifty 100 Equal Weight Index.

## PERFORMANCE & VOLATILITY

- Sundaram Nifty 100 Equal Weighted Fund as the name implies has an equal allocation to the Nifty 100 stocks of 1% each. The assumption is that over long periods of time the market appreciates equally across companies.
- These broad-based rallies occur during all round economic growth and is based on the view that India is well poised to experience all round economic growth over the next several years.
- The Risk in investing in an Equal Weighted fund is if economic growth and company growth is uneven the fund will underperform. There can be periods when this happens like the rally of 2018 / 2019 when only a few stocks rallied
- Investors who expect all round economic growth should consider investing in Sundaram Nifty 100 Equal Weight Fund.

## CORE AND SATELLITE PORTFOLIO STRATEGY

### SMART BETA FUNDS ARE BASED ON

- predetermined rules
- are regularly rebalanced
- based on factors
- not based on market capitalization For e.g. Value, Growth, Equal weighted, Quality etc., and combines advantages of active investing & passive investing.

An example of a simple Smart Beta strategy is Equal weighting of an Index. An equal weighted index removes emphasis on individual stocks in the index with both the largest market cap weighted stock and the lowest market cap weighted stock being given the same weightings. This moderates volatility and mitigates risk for when the largest market cap stocks underperform, they have an outsized impact on the performance of the entire index.

**SMART BETA FUNDS** are an attractive alternate approach to traditional index based funds that has the possibility of not only outperforming them but also has a potentially lower risk.

Ideally suited for Institutions (PF Trusts etc.,) and conservative investors for construction of a Core-satellite portfolio with allocation to Smart Beta funds forming the core and complemented by actively managed funds.

### THIS STRATEGY IS BASED ON THE FOLLOWING FACTORS

- Anti momentum booking
- Forces buy low, sell high – profit
- Mean reversion
- Can represent the underlying economy better.
