FUND FACTS & FEATURES

FUND MANAGER UPDATE

Equity

- Average BSE200 TTM PE 23.3x and BSE200 TTM PB 3.6 end of June. Based on the allocation framework, the net long equity allocation 55.8%. Portfolio continues to have moderate sector bets with preference towards stocks with a growth bias and trading at reasonable risk reward. Portfolio carries moderate overweight in financial services, consumer discretionary and underweights in technology.
- Sectoral Overweight**
- Financial services:** Benign credit costs, accommodative regulatory stance with emphasis on growth, improving liquidity and reasonable valuations keeps us positive on banks.
- Consumer Discretionary:** Focus on specific companies within the sector who have opportunities to clock medium-term growth through improving market share against unorganized players.
- Sectoral Underweight**
- Metals & Mining:** Moderation of commodity prices and uncertainty of growth in global markets possess a risk to earnings growth.
- Information Technology:** We are slightly underweight IT due to soft global growth and discretionary spends; recent data showing stabilized demand trends has led to reduced underweights.
- On a cap-curve basis, the fund continues to maintain around 80% exposure to large caps and the rest towards larger-midcaps. These are outcomes of stock selection with focus on structural medium-term growth opportunities, strong balance sheets and good promoter pedigree.

Arbitrage

- Average gross roll spreads stood at ~62 bps during the month.

Fixed Income & REITs/Invits

- Allocations stood at 22% and 2.3% respectively. The exposure is primarily into high quality papers with duration of the book gradually moving up compared to last quarter.
