FUND MANAGER UPDATE

- Average BSE200 TTM PE 20x and BSE200 TTM PB 3 end of March. Based on the allocation framework, proposed net long equity allocation for the month of April 2026 would be 64.5%.
- Portfolio continues to have moderate sector bets with preference towards stocks with a growth bias and trading at reasonable risk reward.
- On a cap-curve basis, the fund continues to maintain around 70% exposure to large caps and the rest towards larger-midcaps.
- These are outcomes of stock selection with focus on structural medium-term growth opportunities, strong balance sheets and good promoter pedigree.

Overweight

- **Financial Services:** supported by improving credit demand, ample system liquidity, stable asset quality, and reasonable valuations.
- **Telecom:** Robust earnings & cash flow growth, led by tariff hike cycle, better operating leverage, improved profitability and debt reduction.
- **Infrastructure and Capital Goods sectors:** aided by government's enhanced infra and defence budget outlays, as well as increased data centre investments in India. We prefer stocks that have the combined moat of execution excellence, technological superiority and policy protection.
- **IT:** valuation-led play combined with a structural bet on Artificial Intelligence (AI) transformation. In addition, a defensive hedge in a volatile global macro environment, as IT services companies are a resilient cash-flow-generating sector with consistent dividend payouts.
- **REITs:** Strong growth in leasing of commercial office space, led by demand from GCCs. Dividend yield of 6-7% offers stable returns akin to that of fixed income.

Underweight

- **Metals & Mining:** reflecting global uncertainties and evolving business trends in the current macro environment. A prolonged geo-political conflict could result in global demand slowdown, rising input costs and earnings volatility.
- **Utilities:** the sector's regulated equity model and relatively slow-and-steady nature would result in earnings growth lagging that of high-growth sectors.
- **FMCG:** unfavourable risk-reward due to expensive valuations.
