FUND MANAGER UPDATE

- This fund dynamically invests across large, mid, and small caps based on relative at-attractiveness and valuations. This fund is aiming to capture stock specific opportunities irrespective of cap curve going forward. Stock selection across cap curves and especially within the mid and small cap ideas are largely based on bottom-up approach. Currently, about 74% of the fund is allocated towards large caps and rest across mid and small caps.
- The fund has shown resilience during recent market volatility.
- We are overweight in Banks due to relatively favourable valuations. We continue to re-main underweight in Power, IT.
- We reduced/exited some weights in certain stocks to book profits or to reduce risk due to near term headwinds.
