Fund Insights - November 2025

FUND FACTS & FEATURES

FUND MANAGER UPDATE

- Sundaram Mid Cap Fund aims to identify opportunities in high growth categories with reasonable valuations. The fund follows a strategy of bottom-up stock selection that aligns with macroeconomic trends.
- The fund employs a balanced structural and cyclical approach. Pockets of consumer discretionary are given over-weight for their continuous demand supported by the growth of the Indian middle-class income. On the cyclical side, reducing exposure to NBFCs and adding weight to sectors like cement and telecom based on market trends.
- We are increasing exposure to banks due to attractive valuations and reducing PSU stocks to create a balanced blend of growth and value. We are focusing on visibility for free cash flow and growth opportunities. Nominal GDP growth and the segment's underlying factors, along with bottom-up mid cap investing, offer sustained growth opportunities.
- The fund is capturing selective opportunities like pockets in discretionary consumption, capex driven industrial and few capital market options.
