- Exit Load**
Nil – for up to 25% of the units and 1% formore than 25% of the units, if redeemed within 365 days from the date of allotment.
Nil For redemption after 365 days from the date of allotment.

FUND MANAGER UPDATE

Stock Picks: Maintain a bottom-up approach, staying diversified with an eye on pockets that offer earnings surprises or additional tailwinds.

Prioritize businesses with consistent cash generation and agile management teams capable of medium-term reinvestment.

Active Bets: We have taken active bets in Auto Components, Pharma & Healthcare, and Industrials, targeting demand revival, pricing strength, and capex-led opportunities in emerging segments.

CONVICTION SECTORAL POSITIONING

Overweight (O/W)

Auto Components: We see a brightening demand cycle here and opportunities for companies to grow by launching new, innovative products.

Pharma & Healthcare: This is a high-conviction area for us due to better pricing, constant innovation, and the fact that quality healthcare is still reaching new parts of India.

Industrials: We are positioning the fund to benefit as private companies begin to spend in emerging segments.

Neutral

Information Technology: We are neutral in some and underweight in some, waiting for more consistent growth signals from the global tech landscape.

Underweight (U/W)

Metals & Commodities: We prefer to stay light in these sectors to avoid the sharp price swings typical of global raw materials, focusing instead on steadier domestic growth stories.

TOP 10 - INDUSTRY PROFILE (%)

FUND MANAGER OUTLOOK

Normalization in Earnings growth underway: Earnings cycle has been largely inline with expectations. Growth rates for midcaps, though in healthy double-digits, have normalized from the strong earnings expansion witnessed during post-pandemic phase. Sectoral dispersion in growth rates remains high and opportunities remain bottom-up amidst a dynamic environment. Select pockets within midcaps viz., domestic cyclicals, such as banking, industrials have started to witness improvement on growth metrics.

Corporate Leverage remains low – Emerging opportunities to kickstart reinvestment cycle and provide medium-term growth levers: Recent policy pivots towards emerging segments such as datacenters and logistics corridors to support medium-term private sector investments in the related eco-systems. At an aggregate level, midcap companies continue to record steady cash flows and exhibit under-levered balance sheets. They remain well-placed to reinvest capital in such emerging segments apart from tapping into adjacencies and acquiring capabilities through inorganic route.
