Growth & IDCW (Payout, Re-investment, Transfer)

FUND MANAGER UPDATE

- Combining low correlated assets during volatile market conditions provides better risk adjusted return during high volatility.
- Historically, equity and gold tend to have low correlation, and gold has been less volatile compared to stocks over the past decade. This makes Sundaram Multi Asset
- Fund a good option for investors, as we strictly allocate about 20% to 25% of our portfolio to gold.
- Since 2022, central banks have quietly increased their gold reserves by over 3,000 tonnes in three years, coupled with intensified geopolitical scenario has driven gold return.
- Currently, our portfolio is made up of 58.5% net long equity, 21% in gold, 7.6% arbitrage, and 10% debt. Equity allocation is focused on large-cap stocks. The mix of equity and gold creates a well balance when there are concerns about market valuations and volatility.

TOP 10 EQUITY HOLDINGS (%)

Particulars	Weight
HDFC Bank Ltd	5.0%
ICICI Bank Ltd	4.7%
Reliance Industries Ltd	4.3%
