FUND MANAGER UPDATE

WHY SERVICES FUND?

- Because Services accounts for 55% of GDP
- Services companies have high margins
- Services companies are easy to scale and so can grow faster
- Portfolio is diversified across 17 sectors (ex., Financials, IT, Retail, Entertainment, Hospitality, Health and Wellness, Tourism, Logistics, etc.)
- Portfolio diversified across market cap making it comparable to a diversified fund
- New opportunities arise as many startups are in the Services segment given technological advancement, high growth, ease of scalability and access to capital
- Growth of Manufacturing positively influences the Services sector ex. establishment of a new factory drives demand for multiple service industries to cater to it.

PERFORMANCE HIGHLIGHTS

Sundaram Services Fund over the last 1 year outperformed the benchmark (Nifty Services Sector) by 1.48% - the fund returned -7.78% against the benchmark's 9.26%.

- **Power & IT:** The fund's active underweight In Power & IT sectors, combined with diversification into Healthcare, Services and Consumer Durables - sectors with zero or minimal presence in the benchmark - was a key driver of the outperformance.
- **Consumer Services:** This was the principal drag on relative performance.
- **Telecommunication**
- **Information Technology:** Avoiding the large-cap IT names was decisive as the sector fell over 20%. Our IT exposure leans toward new-age platforms rather than traditional IT services.
- **Healthcare**

FUND MANAGER OUTLOOK

Capturing the Service Revolution: Capturing the Service Revolution: The services sector now accounts for over 55% of India's GDP. It is the fastest-growing part of our economy, and we are positioned to capture this shift toward a more service-led lifestyle.

Growth at a Reasonable Price: Service companies often have high efficiency (ROE), which can make them expensive. However, we've managed to keep the fund's valuation comparable to the Nifty, ensuring you aren't overpaying for growth. Growth Focus: A combination of Lending Financials and select high-growth businesses forms key portfolio exposures.

Emerging Trends as Key Enablers: The rise of digital efficiency and "speed-as a-service" is creating a new class of winners. From logistics to telehealth, we are constantly looking for the next trend that makes life simpler and faster for the Indian consumer.

Disciplined Participation: Our approach remains calm and valuation conscious. We don't chase every "hot" trend; we only participate in growth stories where the business fundamentals are strong, and the entry price makes sense for our investors
