**MARKETS AND MACRO**
**Crude, HK, Singapore, Brazil topped returns in July (% m/m, in USD)**

**IT, Media, Realty top O/P in the month of July (% m/m)**

The month of July continued to witness US-Iran tensions, leading to increased Crude price volatility. US macro data however reflected a resilient economy and both Fed members and the Fed policy were seen cautious on rates. Germany announced its plans to break away from decades of fiscal restraint and borrow heavily, with a skew towards defence spending. Japanese inflation picked up and the Japanese Yen came under pressure, touching a 40Y low. IMF flagged a weaker and more fractured global growth outlook. July ended with an increasing sense of uncertainty, with Houthi attacks disrupting activity in the Bab el-Mandeb strait and Iranian attacks at US military bases in Jordan/Egypt. These gave markets an indication of probably longer and more complex routes for Asian oil consumers into the weeks ahead.

NIFTY delivered 2.2% returns in rupee terms for the month of July. IT, Media, Realty were top outperformers, while Energy, PSU Banks and Private Banks were key underperformers. On cap curves, Large cap outperformed, Small caps, followed by BSE500 and Midcaps. FIIs remained net buyers at \$5.6bn. Equity saw \$2.5bn of inflows and debt saw \$3.1bn inflows. Continued rupee stability has probably brought focus back to India equity and debt alike. RBI announced dollar inflows having crossed \$40bn by end-Jul'24, with \$37bn from FCNR(B) deposits. RBI reiterated its commitment to domestic price and external stability and acknowledged banking system resilience. India strengthened its energy security and received a favourable tariff tier from the US.

Economic activity meanwhile remained robust. Gross GST collections grew 15.4% in July (on June sales) to hit INR 2.1 tn (INR 1.9 tn in June). Net collections, after refunds, grew to INR 1.1 tn (INR 1.62 tn) up 11.7%.

**MACRO DASHBOARD**
**Manufacturing and Services PMIs continued to moderate in July**

**India 10Y yields continue to tag the direction of Crude prices**

**Crude price across 7 global disruptions normalises well within 1Y**

**NIFTY price movement across 7 Crude shocks (% Chg.)**

**Fed over projects rates in upcycles and under projects down cycles**

**Fed over projects rates in upcycles & under projects down cycles**

|----------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>INR 10-year G-Sec</b>                     | 6.75%                                                                                                                                                                                                                                                                                                                                                                                               | 6.83%             | The 10-year G-Sec yield rose to 6.83% as renewed geopolitical tensions in West Asia drove up global crude oil prices, stoking domestic inflation concerns.                                                                                                                                                           |
| <b>INR 5-year G-Sec</b>                      | 6.42%                                                                                                                                                                                                                                                                                                                                                                                               | 6.45%             | The 5-year G-Sec yield remained almost flat at 6.45% and the 5Y-10Y spread widened to 38 bps from 33 bps, earlier.                                                                                                                                                                                                   |
| <b>1-year OIS</b>                            | 5.76%                                                                                                                                                                                                                                                                                                                                                                                               | 5.92%             | The 1-year OIS rate surged to 5.92%, driven by escalating geopolitical tensions and lingering concerns over persistent CPI inflation.                                                                                                                                                                                |
| <b>5-year OIS</b>                            | 6.18%                                                                                                                                                                                                                                                                                                                                                                                               | 6.41%             | The 5-year OIS rate also hardened by approximately 23 bps to close at 6.41% as markets priced in higher inflation risks amid rising crude oil prices, weak monsoon concerns, and renewed geopolitical tensions in West Asia.                                                                                         |
| <b>PMI Composite</b>                         | 59.3<br>(May'26)                                                                                                                                                                                                                                                                                                                                                                                    | 57.1<br>(June'26) | India's HSBC Composite PMI declined to 57.1 in June 2026, with softer expansions recorded in both the manufacturing and service sectors.                                                                                                                                                                             |
| <b>PMI Manufacturing</b>                     | 55.0<br>(May'26)                                                                                                                                                                                                                                                                                                                                                                                    | 54.2<br>(June'26) | Manufacturing PMI eased to 54.2 in June 2026, signalling continued expansion but at a slower pace. Growth slowed across output, new orders, export orders and employment, with international sales recording their weakest increase since March 2023.                                                                |
| <b>PMI Services</b>                          | 59.8<br>(May'26)                                                                                                                                                                                                                                                                                                                                                                                    | 57.4<br>(June'26) | India's Services PMI declined to 57.4 in June 2026. The moderation in PMI was largely attributed to softer demand conditions and increasing competitive pressures in the market.                                                                                                                                     |
| <b>Banking System Liquidity (₹ Lakh Cr.)</b> | 0.97                                                                                                                                                                                                                                                                                                                                                                                                | 1.12              | Average daily banking liquidity increased marginally to a ₹1.12 tn; likely supported by FCNR inflows.                                                                                                                                                                                                                |
| <b>CPI (%)</b>                               | 3.94%                                                                                                                                                                                                                                                                                                                                                                                               | 4.38%             | CPI inflation climbed higher to 4.38% YoY in June 2026, compared with 3.94% in May 2026, driven by higher food (5.3% YoY) and energy (4.5% YoY) with steady core inflation (3.9% YoY).                                                                                                                               |
| <b>WPI (%)</b>                               | 9.68%                                                                                                                                                                                                                                                                                                                                                                                               | 9.87%             | WPI inflation inched up to 9.87% YoY in June 2026, up from 9.68% in May 2026. The uptick was primarily driven by higher inflation in primary articles (7%), while manufactured products inflation remained broadly stable at elevated levels.                                                                        |
| <b>INR vs USD</b>                            | 94.67                                                                                                                                                                                                                                                                                                                                                                                               | 95.39             | The INR appreciated by 0.76% against the USD in July. Among 23 EM currencies, the INR ranked 16th.                                                                                                                                                                                                                   |

**EQUITY OUTLOOK**

July was a month where markets balanced three moving parts: the escalation of the West Asia conflict and the resulting spike in crude oil prices, the unwinding of crowded AI-led global trades and its impact on foreign flows, and the progress of Q1 earnings as investors looked for confirmation that corporate growth remains on track. While these factors created bouts of volatility, the Indian markets demonstrated resilience. Domestic liquidity remained supportive, earnings commentary was largely constructive, and foreign flows improved before dip in the latter part of the month.

Despite concerns around the West Asia conflict, uneven monsoon progress and fears of food inflation, India's macroeconomic outlook remains manageable for now. Currency volatility picked up briefly alongside the escalation in geopolitical tensions, but the rupee subsequently stabilised close to where it began the month as concerns eased. The RBI's recently reported FCNR inflows of USD 36.7 billion highlight continued confidence in India's external position and provide an additional buffer against global uncertainties. While a prolonged conflict could weigh on growth, inflation and external balances, a de-escalation in tensions could improve the macro outlook meaningfully and allow markets to focus back on domestic fundamentals.

Global markets also witnessed a healthy correction in AI-linked trades that had dominated capital allocation over the last two years. Encouragingly, the correction was largely valuation-led rather than earnings-driven. South Korea and Taiwan remained well-supported by both domestic and foreign investors, while global technology funds continued to attract fresh inflows. Growth in compute demand, capex guidance of hyperscalers, sharp upsurge in memory pricing and its implications on capex assumptions, firm global yields, emergence of relatively competitive Chinese large language models are among the key factors to watch out viz., given the increased debt funding for AI capex. However, the broader evidence suggests that global risk appetite remains intact and capital is becoming more selective rather than exiting growth assets altogether.

India's domestic growth narrative continues to remain constructive. Most high-frequency indicators such as automobile sales, banking credit growth, manufacturing and services PMI point towards steady economic momentum, while industry credit data increasingly suggests a broad-based improvement in private sector investment activity. Investment intentions are strengthening across value-added manufacturing segments including chemicals, electrical equipment, electronics supply chains, auto ancillaries and consumer durables, supported by favourable policy initiatives and improving corporate balance sheets. As private sector capex gradually complements public investment, the foundation for a broader earnings cycle appears to be strengthening.

From a market perspective, opportunities today are increasingly being driven by earnings rather than valuations. While aggregate market valuations appear reasonable, much comes from the sharp de-rating witnessed in large banks and IT services over the past year. Consequently, Q1FY27 earnings have assumed greater significance. Earnings announced so far indicate healthy growth across industrial manufacturing, construction, automobiles, financials, chemicals and power, supported by strong order inflows, execution and resilient demand. Consumer-facing sectors have largely reported stable volume growth, although pockets of pressure remain from commodity inflation. Banking trends continue to reflect healthy asset quality and profitability, while industrial companies are benefiting from strong execution and investment activity. By contrast, IT commentary remains cautious with softer profitability guidance, and energy sector earnings have been impacted by higher crude-related pressures. Overall, the earnings season continues to support the view that growth remains broad-based, with leadership gradually shifting towards sectors benefiting from investment, manufacturing and domestic demand.

For investors, the near-term will continue to be shaped by developments in crude prices, foreign flows and the remaining Q1 earnings announcements. However, with domestic growth remaining resilient, private investment activity gaining momentum and corporate earnings holding up across most sectors, we continue to favour a measured and staggered approach focused on businesses exposed to India's structural growth opportunities.

**FIXED INCOME OUTLOOK**
**Fx and Liquidity**

FCNR (B) deposit scheme has been off to a good start with collections by end July touching approx. USD 35 bn. Besides ECBs and other foreign currency borrowing have collected close to USD 5 bn.

Fx inflows through FCNR B and ECBs is expected to aid the balance of payment position leading it into a surplus. INR has remained largely sideways through July, trading in a band of 95-96 vs the USD. Despite the inflows, appreciation has been modest as inflows have probably been offset against RBI's maturing forward book (short dollar position) besides also being accumulated.

**Market outlook and investment strategy**

10-year benchmark yields spiked from 6.66 % at the end of February to 7.03 % by end May 26 and have since fallen to under 6.75% by July as risks have abated somewhat with the US and Iran back to the negotiating table.

Post the August policy, markets will rotate back to refocus on near-term issues such as progress of the monsoon and the shape of final settlement between the US and Iran.

The combination of a dovish policy and sanguine supporting statements around the policy on keeping liquidity comfortable have helped abate near term market concerns. RBI also assuaged market concerns, stating that inflation was under control and had in fact lagged estimates in Q1. RBI also lowered the full year forecast by 10 bps to 5.0%, adding that inflation had not exhibited a tendency to get generalized or broad based in Q1.

The money market curve has rallied in the run up to the policy. We retain a positive view on money market products given easier liquidity expectations. Investors looking for higher 'carry' albeit some volatility can consider the short duration fund and the Corporate Bond fund.

Higher tax bracket investors with a holding period of 2 years or higher can consider the 'income plus arbitrage Fund of Funds' as an alternative as this category qualifies for equity taxation if held for at least 2 years.

## HOW TO READ THE FACTSHEET

### Minimum Amount

This is the minimum investment amount for a new investor in a mutual fund scheme.

### SIP

A Systematic Investment Plan (SIP) is a way to invest a fixed amount of money regularly. It works like a recurring bank deposit. For example, you can set up an SIP to invest Rs. 100 on the 1st of every month in an equity fund for a certain period, like three years.

### NAV

The NAV (Net Asset Value) is the price of one unit of a mutual fund after all expenses have been deducted. It shows the total value of the fund's assets divided by the number of units. The NAV is calculated at the end of each business day and is the price at which you buy or sell units of the mutual fund.

### Benchmark

A benchmark is a group of securities, often a market index, used to measure the performance of mutual funds and other investments. It helps investors compare how well their investments are doing. Common benchmarks include indexes like NIFTY, SENSEX, BSE200, BSE500, and the 10-Year Government Security (G-sec).

### IDCW Option

In line with applicable SEBI guidelines, with effect from April 1, 2021, the name of "Dividend Option" under the Schemes stand revised as "Income Distribution cum Capital Withdrawal (IDCW) Option". IDCW Option may offer Payout and Reinvestment Sub-options / facilities. Investors may note that the amounts can be distributed out of investor's capital (Equalization Reserve), which is part of sale price that represents realized gains.

### Exit Load

Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceed at net value of NAV less Exit Load. For instance if the NAV is Rs. 100 and the exit load is 1%, the investor will receive Rs. 99.

### Net Equity

Net equity level is the net equity exposure percentage adjusted for any derivative positions in stocks or index for hedging or rebalancing purpose.

### AUM

AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm

### Holdings

The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager

### Nature of Scheme

Mutual funds are categorized into Equity Funds, Debt Funds, Hybrid Funds, Solution-Oriented Funds, and additional schemes like Index Funds and Funds of Funds. Each category caters to diverse investment goals, offering flexibility for varying risk appetites and financial objectives.

### Rating Profile

Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

### Market Capitalisation

Market cap is calculated by the number of shares outstanding, multiplied by the current market price of one share. A mutual fund categorized by market cap (i.e., small-cap, mid-cap or large-cap) indicates the size of the companies in which the fund invests, not the size of the mutual fund.

### Weighted Average / Median Market Cap

Weighted average market capitalization is a type of market index in which each component is weighted according to the size of its total market capitalization. Median Market Cap is the midpoint of market capitalization of the stocks in a portfolio.

### Riskometer

Riskometer is a graphical representation of the risk a mutual fund carries. The graph is designed as per the Association of Mutual Funds in India (AMFI) guidelines.

## QUANTITATIVE MEASURES EXPLAINED

### Sharpe Ratio

The Sharpe Ratio is a measure that compares the return of an investment to its risk. It shows how much extra return is generated for each unit of risk taken, compared to a risk-free investment. A positive Sharpe Ratio means the portfolio is giving investors better returns for the risk they're taking. It is calculated using standard deviation and excess return to determine reward per unit of risk.

### Beta

Beta measures how much an investment's price moves compared to the overall market. A Beta of less than 1 means the investment is less volatile than the market, while a Beta greater than 1 means it's more volatile. For a portfolio, Beta ( $\beta$ ) indicates how its returns move in relation to the market index. It helps measure the portfolio's volatility or systematic risk compared to the market as a whole.

### Standard Deviation

Standard deviation is a measure that shows how much an investment's performance can vary. If a mutual fund has a high standard deviation, it means the performance can swing widely, indicating greater volatility. It helps to understand the level of risk or expected price fluctuation of a portfolio. A higher standard deviation means more volatility (higher risk), while a lower standard deviation means less volatility (lower risk).

### Risk Free Return

The theoretical rate of return of an investment with safest (zero risk) investment in a country.

### Total Expense Ratio

Total expenses charged to scheme for the month expressed as a percentage to average monthly net assets.

### Tracking Error

Tracking error indicates how closely the portfolio return is tracking the benchmark Index return. It measures the deviation between portfolio return and benchmark index return. A lower tracking error indicates portfolio closely tracking benchmark index and higher tracking error indicates portfolio returns with higher deviation from benchmark index returns.

### Information Ratio

It is a measure of the risk-adjusted returns of the fund. It is the excess return over benchmark divided by the tracking error.

The information ratio is often used to gauge the skill of fund managers. It measures the expected active return of the manager's portfolio divided by the amount of risk the manager takes relative to the benchmark. The higher the information ratio, the better is the manager's performance. It shows the manager's consistency in generating superior risk-adjusted performance

### Portfolio Yield (Yield To Maturity)

The Yield to Maturity (YTM) is the expected rate of return on a bond if it is held until it matures. It is expressed as an annual percentage. YTM takes into account the bond's current market price, face value, interest rate, and the time left until maturity. It reflects the weighted average yield of all the securities in the bond's portfolio.

### Portfolio Turnover Ratio

Portfolio Turnover Ratio is the percentage of a fund's holdings that have changed in a given year. This ratio measures the fund's trading activity, which is computed by taking the lesser of purchases or sales and dividing by average monthly net assets

### Modified Duration

Modified duration measures how sensitive the price of a security is to changes in interest rates. It shows the percentage change in price for a one-unit change in yield. This formula helps predict how the value of a security or portfolio will change when interest rates move. The modified duration of a portfolio can be used to estimate how its market value will change with each shift in interest rates.

### Macaulay Duration (Duration)

Macaulay Duration (Duration) measures the price volatility of fixed income securities. It is often used in the comparison of interest rate risk between securities with different coupons and different maturities. It is defined as the weighted average time to cash flows of a bond where the weights are nothing but the present value of the cash flows themselves. It is expressed in years/days. The duration of a fixed income security is always shorter than its term to maturity, except in the case of zero coupon securities where they are the same.

# Sundaram Large Cap Fund

An open-ended equity scheme predominantly investing in large cap stocks

| The detailed history is available on <a href="http://www.sundarammutual.com">www.sundarammutual.com</a> |                    |          |                     |            |

Past performance may or may not be sustained in future and should not be used as a basis for comparison with other investments. Past performance is no guarantee of future result. Mutual Fund investments are subject to market risks, read all scheme related documents carefully. There can be no assurance or guarantee that fund's objectives will be achieved. NAV may go up or down, depending on the factors and forces affecting the securities market. The names of the schemes do not in any manner indicate either quality or future prospects and returns

For more details on fund-specific features, detailed risk factors and information on Sundaram Asset Management, please read the Statement of Additional Information and Scheme Information Document available on [www.sundarammutual.com](http://www.sundarammutual.com). Specific to information in the Fact Sheet: Portfolio Attributes: Disclaimer for Income Distribution cum Capital Withdrawal (IDCW): IDCW is declared on the face value of 10 per unit. After declaration and payment of IDCW (including re-investment), the ex-IDCW NAV will decline to the extent of the IDCW payment. Exposure to derivatives: The value indicated for derivatives represents the exposure to equity through to index futures, index options, stock futures and stock options. The margin may be only a proportion of the exposure and to the extent, it is lower, cash in the fund's accounts will be higher.

Portfolio Weights & NAV: Stock and sector weights have been rounded to one- decimal place and may not add exactly to 100%. NAV information in this document is as on **Jul 31, 2026** unless otherwise specified. Returns are based on NAV as of **Jul 31, 2026**. Average AUM for month **Jul 31, 2026**.

**Returns:** As per the SEBI standards for performance reporting, "since inception" returns are calculated based on Rs.10 invested at inception of the funds. For this purpose, the inception date is deemed to be the date of allotment. Returns are computed using the NAV of Regular Plan - Growth Option where a separate IDCW and Growth option is available from inception and an adjusted-series of NAV for Sundaram Diversified Equity (Erstwhile Sundaram Tax Saver) for IDCW declared before separate IDCW & Growth Options were introduced. Returns for periods in excess of one year is on a compounded annual basis; the returns are net of fees and expenses but before taking into account effect of entry load. Returns to investors may be lower to the extent of entry load and timing of investment in the fund. Returns are net of fees and expenses. Past performance may or may not be sustained in future and the numbers should not be used as a basis for comparison with other investments.

Performance Analysis is on an annualized basis as of **Jul 31, 2026**. Computation is based on the month end NAV of the fund, designated benchmarks of the schemes. The risk-free Index is MIBOR Overnight. Data Source: Bloomberg; Computation: In- house. Fund Features: Scheme Type, Investment Objective, Plans, Options, Entry Load and Exit Load have been outlined in the respective fund-specific Fact Sheet pages. NAV will be published on every business day.

The balance portion would be invested in debt and money market instruments. This fund has been closed for subscription.

**Sundaram Aggressive Hybrid Fund (Erstwhile Sundaram Equity Hybrid Fund):** • Equity and equity related instruments: 65%-80% • Fixed Income, Money Market instruments and Cash & Cash Equivalents: 20%-35%, Investment in REITs & InvITs: 0-10% • The scheme may invest in Securitized Debt up to 20% • Exposure in derivative shall not exceed 50% of the net assets of the scheme.

**Sundaram Equity Savings Fund:** • Equity and Equity related instruments (including derivatives): 65%-90% • Derivatives includes Index Futures, Stock Futures, Index Options, Stock Options, etc., backed by underlying equity (only arbitrage opportunities)\*: 25%-90% • Unhedged Equity position: 15%-40% • Fixed Income, Money Market\*: 10-35% • Units issued by REITs/InvITs: 0-10%; \*Hedged equity positions from investing in arbitrage opportunities. \*\*The scheme may invest in securitized debt up to 25% of the net assets of the Fixed Income portion.

**Sundaram Balanced Advantage Fund:** • Equity and equity-related instruments : 0%-100% (Risk Profile: High) • Fixed Income, Money Market instruments, Government Securities and Cash & Cash Equivalents: 0%-100% (Risk Profile: Low to Medium) • Units issued by REITs/ InvITs: 0%-10% (Risk Profile: Medium to High). The Scheme may use derivatives for trading, investment, hedging and portfolio balancing. Exposure to derivatives will be limited to 50% of the net asset value of the Scheme at the time of transaction. The scheme may invest in securitized debt up to 35% of the fixed income allocation (including accrued interest). The scheme shall engage in securities lending subject a maximum of 20% and 5% for a single counter party. • The scheme may invest in repo in corporate bond up to 10% of the net assets of the fixed income allocation, in accordance with SEBI regulations. • The Scheme will not invest in foreign securities and credit default swaps.

**Sundaram Arbitrage Fund:** • Equities and equity linked instruments: 65%-100% (Risk Profile: High). • Derivatives including Index Futures, Stock Futures, Index Options and Stock Options, etc.: 65%-100% (Risk Profile: High), Debt securities, money market Instruments & cash and cash equivalents: 0%-35% (Risk Profile: Low to Medium) • The fund will not have any net long equity and all equity positions will be hedged fully i.e. the equity portion

of the Scheme will be hedged 100% at all times. In times where arbitrage opportunities are scarce/ not attractive the asset allocation to be as follows:

• Equities and equity linked instruments: 0%-65% (Risk Profile: High). • Derivatives including Index Futures, Stock Futures, Index Options and Stock Options, etc.: 0%-65% (Risk Profile: High), Debt securities, money market Instruments & cash and cash equivalents: 35%-100% (Risk Profile: Low to Medium) • The fund will not have any net long equity and all equity positions will be hedged fully i.e. the equity portion of the Scheme will be hedged 100% at all times. The exposure to derivatives taken against the underlying equity investments should not be considered for calculating the total asset allocation. Exposure is calculated as a percentage of the notional value to the net assets of the Scheme. The Scheme will use derivatives for trading, hedging and portfolio balancing. The cumulative gross exposure to equity, debt, money market instruments and derivatives shall not exceed 100% of the net assets of the scheme, subject to SEBI circular No. CIR/ IMD/ DF/11/2010 dated August 18, 2010. The margin money requirement for the purposes of derivative exposure will be held also in the form of term deposits, cash or cash equivalents or as may be allowed under the Regulations. The Scheme may invest in the schemes of mutual funds in accordance with the applicable extant SEBI (mutual funds).

#### Sundaram Multi Asset Allocation Fund:

Equities and equity linked instruments: 65%-80%; Debt and Money Market Instruments: 10-25%; Gold ETFs as permitted by SEBI: 10-25%. Equity and equity-related securities includes Convertible bonds, debentures and warrants carrying the right to obtain equity shares. • The scheme shall not engage in short selling. • The scheme shall engage in securities lending subject a maximum of 20% and 5% for a single counter party. • The Scheme shall invest in repo in Corporate Bond up to 10% of the net assets of the scheme. • The scheme shall engage in securities lending subject to a maximum of 20% of the net assets of the scheme. • The Scheme may use derivatives for trading, hedging and portfolio rebalancing. Exposure to derivatives will be limited to 50% of the net asset value of the scheme at the time of transaction. The scheme will maintain cash or securities to cover exposure to derivatives.

**Sundaram NIFTY 100 Equal Weight Fund:** • Equity and Equity related Instruments covered by NIFTY 100 Equal Weighted Index: 95-100% (Risk Profile: High). Debt instruments, cash and money market instruments including Triparty Repo (TREPS)/ Reverse Repo: 0-5% (Risk profile: Low to Medium). The Scheme shall not invest in derivative instruments. Pending deployment of funds in terms of the investment objective, the funds may be invested in short-term deposits with scheduled commercial banks in accordance with applicable SEBI guidelines.

**Sundaram Liquid Fund (Erstwhile Sundaram Money Fund):** • Debt securities, money market instruments, cash and cash equivalents\* (including securitised debt) up to a maximum of 25% of the net asset value of the scheme) 0% - 100%. The scheme shall invest in debt and money market securities with maturity of up to 91 days only. Exposure to derivatives will be limited to 50% of the net asset value of the Scheme at the time of transaction:

**Sundaram Overnight Fund:** Investment in Debt, Money Market instruments, Cash and Cash equivalents with overnight maturity/ maturing in one business day: up to 100%. The Scheme may invest in Repo/ Reverse Repo transactions in Corporate Debt Securities, liquid schemes of mutual funds in accordance with guidelines issued by SEBI from time to time.

**Sundaram Money Market Fund:** • Money Market Instruments\* as defined by RBI/ SEBI from time to time and Cash: 100% (\*Money Market Instruments include Certificate of Deposits, Commercial Papers, T Bills, Government Securities having an unexpired maturity up to 1 year, Call or notice Money, non-convertible debentures of original or initial maturity up to one year, Commercial Bills, Bills rediscounting, CBLR, reverse repo and any other instruments as defined by RBI/SEBI from time to time)

**Sundaram Low Duration Fund:** • Debt securities/ Money market instruments and Cash & Cash Equivalents\* ("Ensuring that the Macaulay duration of the portfolio will be maintained between 6 & 12 months): 0% - 100% • Exposure to derivatives will be limited to 50% of the net asset value of the Scheme at the time of transaction; Investment in securitised debt may be up to 50% of the net assets.

**Sundaram Short Duration Fund:** • Debt securities/ Money market instruments and Cash & Cash Equivalents\*: Up to 100% (\*Ensuring that the Macaulay duration of the portfolio will be maintained between 1 and 3 years) • Exposure to derivatives will be limited to 50% of the net asset value of the Scheme at the time of transaction; investment in securitised debt may be up to 25% of the net assets. Repo and corporate bonds: up to 10%. The scheme shall engage in securities lending subject to a maximum of 20% and 5% for a single counter party.

**Sundaram Banking and PSU Fund:** • Money market and debt\* securities issued by Banks, Public Sector Undertakings (PSUs) and Public Financial Institutions (PFIs) and Municipal Bonds: 80%-100% • Other Debt and Money Market Securities\*: Up to 20% ; • Exposure to derivatives will be limited to 50% of the net asset value of the Scheme at the time of transaction. • Investment in Securitized Debt will be up to 25% of the net assets

**Sundaram Corporate Bond:** • Investment in corporate bonds (only in AA+ and above rated corporate bonds): 80%-100% • Other debt securities and Money Market Instruments, Cash and Cash Equivalents: 0%-20% • Investment in securitised debt will be up to 25% of the net assets. Exposure to derivatives will be limited to 50% of the net asset value of the Scheme at the time of transaction.

**Sundaram Medium Duration Fund:** • Debt instruments & Money Market Instruments, Cash and Cash equivalents\*: Up to 100% (\*Ensuring that the Macaulay duration of the portfolio will be maintained between 3 years and 4 years. Portfolio Macaulay duration under anticipated adverse situation is 1 year to 4 years)

**Sundaram Conservative Hybrid Fund:** • Debt Securities, Money Market instruments & Cash and Cash Equivalents: 75%-90%; • Equity and equity related instruments: 10%-25%. • Investment in REITs and InvITs: 0%-10%. • Exposure to derivatives will be limited to 50% of the net asset value of the Scheme at the time of transaction. • Debt securities may include securitised

debt up to 25% of the net assets.

**Sundaram Ultra Short Duration Fund** • Debt instruments, Money Market instruments & cash and cash equivalents\*: Up to 100% (Risk Profile: Low to Medium) \*Ensuring that the Macaulay duration of the portfolio will be maintained between 3 to 6 months. • Exposure to derivatives will be limited to 50% of the net asset value of the Scheme at the time of transaction. • Debt securities may include securitised debt up to 25% of the net assets • The Scheme shall invest in repo in Corporate Bond up to 10% of the net assets of the scheme.

**Standard Risk Factors:** Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal. As the price/ value/ interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down. As with any investment in stocks, shares and securities, the NAV of the Units under the Scheme can go up or down, depending on the factors and forces affecting the capital markets. Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme. The sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of 1 lakh made by them towards setting up the Fund. The present Scheme is not guaranteed or assured return Scheme. Change in Government policy in general and changes in tax benefits applicable to mutual funds may impact the returns to Investors. Applicable to equity schemes (except Sundaram Diversified Equity (Erstwhile Sundaram Tax Saver & Sundaram ELSS Tax Saver Fund). For any overseas investments in equity funds - country risk, currency risk and geopolitical risk, to name a few.

#### Scheme-Specific Risk Factors:

**Sundaram Large Cap Fund:** • Investment in the scheme may be affected by risks associated with equities and fixed income securities. • The Scheme aims to provide long term capital growth by predominantly investing in large cap stocks. however, given the inherent risks of investing in equity markets, the value of the investments may go up or down. • The Scheme retains the flexibility to hold from time to time relatively more concentrated investments in a few sectors. This may make the Scheme vulnerable to factors that may affect these sectors in specific and may be subject to a greater level of market risk leading to increased volatility in the Scheme's NAV. • Changes in government policies may impact the performance of the Scheme. • The scheme shall engage in Securities lending, which includes risks such as counter party risk, liquidity risk and other market risks. • Investment in REITs/ InvITs instruments involve risks such as Interest-Rate Risk, Risk of lower than expected distributions, Liquidity Risk, Price-Risk and etc. • The scheme may invest in ADR/GDR/Overseas Securities. These investments may expose the scheme to investment risks associated with such investments like currency risk etc. • The scheme may invest in Repo in Corporate Bonds. These investments may expose the scheme to investment risks associated with such investments. • The Scheme may use derivative instruments for the purpose of trading, hedging and portfolio balancing, as permitted under the Regulations. usage of derivatives will expose the scheme to certain risks inherent to such derivatives. • Segregated portfolio may be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered credit Rating agency (CRA) which involves Liquidity Risk & credit Risk and etc.

**Sundaram Focused Fund:** Since the number of stocks would be limited to 30, the portfolio may be more concentrated and volatile in comparison to a more diversified portfolio of equity securities. Sundaram Mid Cap Fund: • Volatility - • Low Liquidity • Equity Price risk • Risk associated with Securities Lending • Derivative Risk • Segregated portfolio Risk Sundaram Small Cap Fund: • Volatility • Low Liquidity • Equity Price Risk • Dependency Risk • Temporary Investment Risk • Non-diversification Risk • Asset-Class Risk • Segregated portfolio Risk. Sundaram Large and Mid Cap Fund: Non diversification & Lack of liquidity • Segregated portfolio Risk. Sundaram Multi Cap Fund: 1. The Scheme has to invest a minimum of 25% in each of large, mid and small cap stocks. So even in times where a particular cap curve may be out of favour and underperform the scheme will be forced to invest in it. 2. The Scheme can invest a maximum of 50% in any one of the cap curves based on the discretion of the Fund Manager. If the call of the Fund Manager is wrong and if the particular cap curve underperforms the performance of the Scheme will be affected. 3. The Scheme will invest a minimum of 25% in each of mid and small cap curves. Mid and small cap stocks are inherently volatile and also suffer from lack of liquidity. 4. Segregated portfolio may be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA) which involves Liquidity Risk & Credit Risk etc.

**Sundaram Infrastructure Advantage Fund:** Infrastructure projects by their very nature have a long gestation period. Therefore, the Fund will rely heavily on future investments in the Infrastructure sector that will take a long time to materialize. The Mutual Fund's NAV will depend upon the performance of the companies within the Infrastructure sector. Normally, in a diversified equity fund, investments are made in companies from different sectors. So, if one sector is not doing well, the investments in the other sector will balance it. The Fund however, will predominantly invest in companies in the Infrastructure sector. The investments will be limited to quality Infrastructure companies. The performance of the Fund will also depend upon the efficiency of the Government to execute projects within a given time frame. The opening up of the infrastructure sector to private/foreign ownership / investment depends upon the policy and guidelines issued from time to time by the Government of India. The growth of Infrastructure sector is greatly dependent on the Government's fiscal policies and legislation. The fiscal policy of the Government may also be subject to the WTO Agreement. The performance of the Infrastructure sector may also be affected by the competitiveness of the industry and firm level inefficiencies. The risks associated with the thematic portfolio will be lower than that of a sector-specific fund and higher than that of a typical diversified fund.

**Sundaram Consumption Fund:** Vagaries of nature such as erratic monsoon, failure of crop & drought, to name a few; cyclical / seasonal factors. Since the Fund invests in companies that essentially focus on industries such as agro chemicals /pesticide/ Sugar, coffee, Tea, Jute products etc are subject to the vagaries of nature like erratic monsoon, failure of crop, folds drought etc. hence the performance of the fund will be affected by it. Industries such as Jute, man made fibre etc., are cyclical /seasonal in nature. They are driven

by demand which may not be consistent in a time period. The performance of the Fund will also depend upon the Government and its policy. The growth oriented Policy adopted by the Government and its ability to execute projects within a given time frame will also have a bearing on the performance of the Fund.

**Sundaram Services Fund:** Investing in specific sectors can be a risky strategy, given that the sector can underperform which may lead to all the companies in the sector underperforming. Newly emerging sectors within the services sector have a high risk return profile. As these tend to be small companies they carry a disproportionately high probability of failure. Also their financials tend to be weak than that of companies that are established. Engaging in securities lending will involve risks such as counter party risk, liquidity risk and other market risk. Any change in Government policies specific to the services sector will have an adverse impact on the Scheme The Scheme may use derivative instruments for the purpose of trading, hedging and portfolio balancing, as permitted under the Regulations. Usage of derivatives will expose the scheme to certain risks inherent to such derivatives. Thus, there is risk of capital loss.

**Sundaram Global Brand Fund Theme - Equity Active FoF (Formerly Sundaram Global Brand Fund):** • Risks of investing in overseas securities. These investments may expose the scheme to investment risks associated with such investments like Foreign exposure and Currency Risk, Country Risk, event Risk, Restrictions imposed overseas, emerging Markets Risks, Regulation Change Risk, Corporate Governance, economic Factors etc. • The Scheme's portfolio consists of the top 30 global brands and is based on an unique selection process which relies partly on third party reports and internal analysis. Any error in the methodologies adopted for valuing brands may affect the portfolio either by omission or by including names which probably should not be included leading to an impact on performance. • While global brand companies are expected to outperform it may not necessarily be so in actual practice (i.e. as they may be fully valued etc.) leading to underperformance. • The methodology used for valuing and identifying brand names may not be able to identify new up and coming companies with potential to be global brands in future leading to having a portfolio of 'yesterday's top brands' leading to missed opportunities and under performance. • Brands may go out of fashion and the methodology may be late in recognizing this leading to having investments in the portfolio that are under performing. • Global brand companies may be over- valued for a variety of reasons and can experience a sharp fall in their value as the market corrects the over valuation leading to underperformance. • Segregated portfolio may be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA) which involves Liquidity Risk & Credit Risk etc.

**Sundaram Balanced Advantage Fund:** • Scheme is to be managed dynamically depending on the Fund Manager's outlook of the economy, markets etc. The Fund Manager may not be able to correctly identify these opportunities resulting in a sub optimal asset allocation leading to a below average or even loss making performance. • There is no guarantee that the Fund Manager will be able to spot investment opportunities or correctly exploit price discrepancies in the different segments of the market. • The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. • The Scheme is also expected to have a high portfolio churn, especially in a volatile market. • There is an execution risk while implementing arbitrage strategies across various segments of the market, which may result in missed investment opportunities, or may also result in losses/high transaction costs. • In case of a large outflow from the Scheme, the Scheme may need to reverse the spot-futures transaction before the settlement of the futures trade. While reversing the spot-futures transaction on the exchange, there could be a risk of price of the market being different from the price at which the actual reversal is processed. • While future market is typically more liquid than underlying cash market, there can be no assurance that ready liquidity would exist at all point in time for the Scheme to purchase and close out a specific futures contract. • In case of arbitrage, if futures are allowed to expire without corresponding buy/sell in cash market, there is a risk that price at which futures expires, may/may not match with the actual cost at which it is bought/sold in the cash market in last half an hour of the expiry day (Weighted average price for buy or sell). • Investment in Equities and Equity related instruments involve risks such as Stock Market Volatility, Equity Price Risk, Dependency Risk, Temporary Investment Risk, non-diversification Risk, Regulation- Change Risk and etc. • Investments in Debt Securities and Money Market Instruments involve risks such as Interest Rate Risk, Credit risk, Price risk, Market risk, Liquidity risk, risk relating to investment pattern, risks relating to duration, non- diversification risk, Limited Liquidity, Price Risk and etc. • Engaging in securities lending will involve risks such as counter party risk, liquidity risk and other market risk. • Investment in REITs/InvITs instruments involve risks such as Interest-Rate Risk, Risk of lower than expected distributions, Liquidity Risk, Price-Risk, etc. • Investment in Repo in Corporate Bond involve risks such as counter party risk, Market Risk, Credit Risk and etc. • The Scheme proposes to invest in equity and equity related instruments by identifying and exploiting price discrepancies in cash and derivative segments of the market. These investments by nature are volatile as the prices of the underlying securities are affected by various factors such as liquidity, time to settlement date, news flow, spreads between cash and derivatives market at different points of time, trading volumes, etc. • Segregated portfolio may be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered credit Rating agency (CRA) which involves Liquidity Risk & Credit Risk, etc.

**Sundaram Equity Savings Fund:** •Risks associated with the Scheme's Arbitrage Strategy • The Scheme proposes to invest in equity and equity related instruments by identifying and exploiting price discrepancies in cash and derivative segments of the market. These investments by nature are volatile as the prices of the underlying securities are affected by various factors such as liquidity, time to settlement date, news flow, spreads between cash and derivatives market at different points of time, trading volumes, etc. • There is no guarantee that the Fund Manager will be able to spot investment opportunities or correctly exploit price discrepancies in the different segments of the market. • The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. • The Scheme is also expected to have a high portfolio churn,

especially in a volatile market. • There is an execution risk while implementing arbitrage strategies across various segments of the market, which may result in missed investment opportunities, or may also result in losses/high transaction costs. • In case of a large outflow from the Scheme, the Scheme may need to reverse the spot-futures transaction before the settlement of the futures trade. While reversing the spot-futures transaction on the Futures and Options exchange, there could be a risk of price of the market being different from the price at which the actual reversal is processed. • While future market are typically more liquid than underlying cash market, there can be no assurance that ready liquidity would exist at all point in time for the Scheme to purchase and close out a specific futures contract. • In case of arbitrage, if futures are allowed to expire without corresponding buy/sell in cash market, there is a risk that price at which futures expires, may/may not match with the actual cost at which it is bought/sold in the cash market in last half an hour of the expiry day (Weighted average price for buy or sell). • Investment in Equities and Equity related instruments involve risks such as Stock Market Volatility, Equity Price Risk, Dependency Risk, Temporary Investment Risk, Non-diversification Risk, Regulation-Change Risk and etc. • Investments in Debt Securities and Money Market Instruments involve risks such as Interest Rate Risk, Credit Risk, Price Risk, Market Risk, Liquidity Risk, Risk relating to investment pattern, Risks relating to duration, Non-diversification Risk, Limited Liquidity, Price Risk and etc. • Engaging in securities lending will involve risks such as counter party risk, liquidity risk and other market risk. • Investment in REITs/ InvITs instruments involve risks such as Interest-Rate Risk, Risk of lower than expected distributions, Liquidity Risk, Price- Risk and etc. • Investment in Repo in Corporate Bond involve risks such as counter party risk, Market Risk, Credit Risk and etc. Any change in policy by the Government/ RBI/Regulator can have an adverse impact on the Scheme.

**Sundaram Aggressive Hybrid Fund:** • Stock Market Volatility: Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. • Low Liquidity – midcap and small stocks are thinly traded and during times of crisis liquidity can dry up even further inhibiting the ability of the Fund manager to exit the stock • Equity Price Risk: Stock prices may rise or decline based on a number of factors. Prices change due to events that impact entire financial markets or industries • Dependency Risk: The Scheme may invest in stocks and mutual funds and exchange-traded funds linked to stocks. Dependent on Stock Movement. • Temporary Investment Risk: Market or economic conditions may become unfavorable for investors in equities • non-diversification Risk: The Scheme may pursue only a limited degree of diversification. • Asset-Class Risk: Stocks have historically outpaced other asset classes such as gold, fixed deposits and bonds, to name a few, over the long-term in India. • Change in Government policy in general and changes in tax benefits applicable to mutual funds may impact the returns to Investors. • Tax-free status for long-term capital gains and IDCW will depend on the fund investing more than 65% in equity to qualify in accordance with provisions of the Income Tax Act, 1961 Sundaram Emerging Small Cap: Varying levels of liquidity, higher volatility, lower levels of transparency, management bandwidth, difficulty in accessing funds and technology, low entry barriers, higher impact costs, risks specific to unlisted companies, risks specific to use of derivatives, lower volume of trading in the units of the Scheme on the NSE and changes in government policies, to name a few, are key factors that may impact the performance of and liquidity in the Scheme.

**Sundaram Multi Asset Allocation Fund** would be investing in Equity & Equity related Securities, Debt & Money Market Instruments, Gold ETFs and such other asset classes permitted by SEBI time to time. Different asset class carry different types of risk as mentioned in the Scheme Information Document. Accordingly, the scheme's risk may increase or decrease depending upon the investment pattern. Scheme would follow Dynamic Asset Allocation pattern as mentioned in the Asset Allocation section of Scheme Information Documents.

**Sundaram Dividend Yield Fund:** • The value of Scheme's investments may be affected by factors affecting the Securities markets and price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in law/ policies of the Government, taxation laws and political, economic or other developments which may have an adverse bearing on individual securities, a specific sector or all sectors. Consequently, the NAV of the units of the Scheme may be affected. • Equity & Equity related securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio may result, at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme's portfolio. • The liquidity and valuation of the Scheme's investments due to the holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment. • Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options. • The liquidity of the Scheme is inherently restricted by trading volumes in securities in which it invests. • Investment decisions made by the Investment Manager may not always be profitable. To the extent the underlying Mutual Fund Scheme invest in Equity and Equity related Instruments, the Scheme(s) which shall invest in Equity Mutual Fund Schemes (where the asset allocation pattern of the Scheme provides such investment) shall be affected by the afore mentioned risk factors. The Net Asset Value (NAV) of the units of the Scheme is likely to get effected on accounts of such risk factors. Any change in the investment policies or fundamental attributes of any underlying scheme is likely to affect the performance of the Scheme. Further, the liquidity of the Scheme's investments may be inherently restricted by the liquidity of the underlying schemes in which it has invested.

**Sundaram Long Term Micro Cap Tax Advantage Fund:** • Sundaram Long Term Micro Cap Tax Advantage Fund Series III would be investing in equity & equity related instruments, debt and money market instruments (such as term/notice money market, repos, reverse repos and any alternative to

the call money market as may be directed by the RBI). The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant. In view of the same, the trustees have the right in their sole discretion to limit redemptions (including suspending redemptions) under certain circumstances or unusual market conditions including stock market closure (otherwise than for ordinary holidays), unforeseen circumstances where disposing assets of the scheme is not in the best interest of unitholders, extreme volatility of markets or if so directed by SEBI. • Investment in ELSS is subject to lock-in period of three years. During this period investors will not be able to redeem their units. To this extent the liquidity for the investor is restricted and this may restrict exit at opportune moments. • Varying levels of liquidity, higher volatility, lower levels of transparency, management bandwidth, difficulty in accessing funds and technology, low entry barriers, higher impact costs, risks specific to unlisted companies and changes in government policies, to name a few, are key factors that may impact the performance of and liquidity in the Scheme.

**Sundaram Long Term Tax Advantage Fund:** • Sundaram Long Term Tax Advantage Fund-Series-I would be investing in equity & equity related instruments, debt and money market instruments (such as term/notice money market, repos, reverse repos and any alternative to the call money market as may be directed by the RBI). The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant. In view of the same, the Trustees have the right in their sole discretion to limit redemptions (including suspending redemptions) under certain circumstances or unusual market conditions including stock market closure (otherwise than for ordinary holidays), unforeseen circumstances where disposing assets of the scheme is not in the best interest of unitholders, extreme volatility of markets or if so directed by SEBI. • Investment in ELSS is subject to lock-in period of three years. During this period investors will not be able to redeem their units. To this extent the liquidity for the investor is restricted and this may restrict exit at opportune moments.

**Sundaram Financial Services Opportunities Fund:** Factors that could impinge on performance include changes in interest rates in India and overseas markets, changes in regulatory framework applicable to companies in financial services, government policy on ownership, savings patterns and deployment of such savings and levels and trends in capital market activity. The scheme being sector specific will be affected by the risks associated with the Financial Services sector. Investing in a sectoral fund is based on the premise that the Fund will seek to invest in companies belonging to a specific sector. This will limit the capability of the Fund to invest in another sector. The fund would invest in equity and equity related securities of companies engaged in the financial services sector and hence concentration risk is expected to be high. Also, as with all equity investing, there is the risk that companies in that specific sector will not achieve its expected earnings results, or that an unexpected change in the market or within the company will occur, both of which may adversely affect investment results. Thus investing in a sector specific fund could involve potentially greater volatility and risk. The risk factors associated with the Sectoral Fund are in addition to the standard risk factors applicable to all the Schemes of the Mutual Fund.

**Sundaram Nifty 100 Equal Weight Fund:** Performance of the NIFTY 100 Equal Weighted Index will have a direct bearing on the performance of the scheme. In the event the underlying Index is dissolved or withdrawn by India Index Services and Products Ltd. (IISL), the Trustees reserve the right to modify the schemes so as to track a different and suitable index and appropriate intimation will be sent to the unitholder of the scheme. Tracking errors are inherent in any indexed fund and such errors may cause the scheme to generate returns, which are not in line with the performance of the NIFTY 100 Equal Weighted Index. Such variations, referred to as tracking error, shall be maximum of 2% per annum, but may vary substantially due to several factors including but not limited to: • Any delay experienced in the purchase or sale of shares due to liquidity of the market, settlement and realization of sales proceeds and the registration of any security transfer and any delays in receiving cash and scrip dividends and resulting delays in reinvesting them. • The NIFTY 100 Equal Weighted Index reflects the prices of securities at close of business hours. However, the Fund may buy or off-load securities at different points of time during the trading session at the then prevailing prices which may not correspond to the closing prices on the National Stock Exchange (NSE). • IISL undertakes a periodic review of the scrips that comprise the NIFTY 100 Equal Weighted Index and may either drop or include new securities. In such an event the Fund will endeavor to reallocate its portfolio but the available investment / disinvestment opportunities may not permit precise mirroring of the NIFTY 100 Equal Weighted Index immediately. • The potential for trades to fail, which may result in the particular scheme not having acquired shares at a price necessary to track the index

**Sundaram Liquid Fund:** Interest rate risk: Changes in the prevailing rates of interest are likely to affect the value of the Scheme's holdings and consequently the value of the Scheme's units. • Derivative risk: The Scheme may use derivative instruments such as Interest Rate Swaps, Forward Rate Agreements or other derivative instruments for the purpose of hedging and portfolio balancing and trading, as permitted under the Regulations and guidelines. usage of derivatives will expose the Scheme to certain risks inherent to such derivatives. There is risk of capital loss. • Capital loss risk: The net Asset Value (NAV) of the Scheme is exposed to market fluctuations, and its value can go up as well as down. Investors may lose their entire principal. • Credit Risk: Credit Risk refers to the risk of failure of interest (coupon) payment and /or principal repayment. • Liquidity Risk: A lower level of liquidity affecting an individual security or an entire market may have an adverse bearing on the value of the Scheme's assets. • Price Risk: As long as the Scheme remains invested, its net Asset Value (NAV) would be exposed to market fluctuations, and its value can go up as well as down.

**Sundaram Overnight Fund:** Some of the specific risk factors related to the Scheme include, but are not limited to the following: • The returns of the Scheme will be affected by changes in interest rates. • Debt market while fairly liquid can at times experience lack of liquidity which may restrict the ability of the Scheme to sell securities resulting in the Scheme incurring losses. • Investments in debt instruments exposes the Scheme to credit risk i.e. the possibility of non-repayment by the issuer of the debt instrument. This can lead to the Scheme incurring losses. • Various types of fixed income securities carry varying levels and types of risk. So the risk may increase or decrease depending upon the investments made e.g. corporate bonds carry a higher level of risk than Government securities. Further even among corporate bonds, AAA rated bonds are comparatively less risky than AA rated bonds. • The AMC may invest in lower rated / unrated securities offering higher yields. This may increase the absolute level of risk of the portfolio. • Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are un-invested and no return is earned thereon resulting in losses.

**Sundaram Money Market Fund:** Changes in the prevailing rates of interest are likely to affect the value of the Scheme's holdings and consequently the value of the Scheme's Units. The Scheme may use derivative instruments such as Interest Rate Swaps, Forward Rate Agreements or other derivative instruments for the purpose of hedging and portfolio balancing and trading, as permitted under the Regulations and guidelines. Usage of derivatives will expose the Scheme to certain risks inherent to such derivatives. Thus, there is risk of capital loss. Investing in Repo in corporate debt and securities lending entails several risks which can impact the performance of the scheme. Changes in the prevailing rates of interest are likely to affect the value of the Scheme's holdings and consequently the value of the Scheme's.

**Sundaram Low Duration Fund:** • Interest rate risk: Changes in the prevailing rates of interest are likely to affect the value of the Scheme's holdings and consequently the value of the Scheme's units. • Derivative risk: The Scheme may use derivative instruments such as Interest Rate Swaps, Forward Rate Agreements or other derivative instruments for the purpose of hedging and portfolio balancing and trading, as permitted under the Regulations and guidelines. usage of derivatives will expose the Scheme to certain risks inherent to such derivatives. There is risk of capital loss. • Capital loss risk: The net Asset Value (NAV) of the Scheme is exposed to market fluctuations, and its value can go up as well as down. Investors may lose their entire principal. • Credit Risk: Credit Risk refers to the risk of failure of interest (coupon) payment and /or principal repayment. • Liquidity Risk: A lower level of liquidity affecting an individual security or an entire market may have an adverse bearing on the value of the Scheme's assets. • Price Risk: As long as the Scheme remains invested, its net Asset Value (NAV) would be exposed to market fluctuations, and its value can go up as well as down.

**Sundaram Medium Duration Fund:** Changes in the prevailing rates of interest are likely to affect the value of the Scheme's holdings and consequently the value of the Scheme's Units. The Scheme may use derivative instruments such as Interest Rate Swaps, Forward Rate Agreements or other derivative instruments for the purpose of hedging and portfolio balancing and trading, as permitted under the Regulations and guidelines. Usage of derivatives will expose the Scheme to certain risks inherent to such derivatives. There is risk of capital loss.

**Sundaram Ultra Short Duration Fund:** • Interest rate risk: • Derivative risk: • Capital loss risk: • Credit Risk • Liquidity Risk • Price Risk: Sundaram Arbitrage Fund: a) The Scheme proposes to invest in equity and equity related instruments by identifying and exploiting price discrepancies in cash and derivative segments of the market. These investments by nature are volatile as the prices of the underlying securities are affected by various factors such as liquidity, time to settlement date, news flow, spreads between cash and derivatives market at different points of time, trading volumes, etc. b) There is no guarantee that the Fund Manager will be able to spot investment opportunities or correctly exploit price discrepancies in the different segments of the market. c) The Risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. d) The Scheme is also expected to have a high portfolio churn, especially in a volatile market. e) There is an execution risk while implementing arbitrage strategies across various segments of the market, which may result in missed investment opportunities, or may also result in losses/high transaction costs. f) In case of a large outflow from the Scheme, the Scheme may need to reverse the spot-futures transaction before the settlement of the futures trade. While reversing the spotfutures transaction on the exchange, there could be a risk of price of the market being different from the price at which the actual reversal is processed. g) While the futures market is typically more liquid than the underlying cash market, there can be no assurance that ready liquidity would exist at all points in time for the Scheme to purchase and close out a specific futures contract. h) In case of arbitrage, if futures are allowed to expire without corresponding buy/sell in cash market, there is a risk that price at which futures expires, may/may not match with the actual cost at which it is bought/sold in the cash market in last half an hour of the expiry day (Weighted average price for buy or sell). i) Investment in equities and equity related instruments involve risks such as Stock Market Volatility, equity Price Risk, Dependency Risk, Temporary Investment Risk, Non-diversification Risk, Regulation-Change Risk and etc. j) Investments in Debt Securities and Money Market Instruments involve risks such as Interest Rate Risk, Credit Risk, Price Risk, Market Risk, Liquidity Risk, Risk relating to investment pattern, Risks relating to duration, Non-diversification Risk, Limited Liquidity, Price Risk etc. k) Investment in Repo in Corporate Bond involve risks such as Counter party risk, Market Risk, Credit Risk and etc. l) Segregated portfolio may be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA) which involves Liquidity Risk & Credit Risk etc.

**Sundaram Banking and PSU Fund:** Changes in the prevailing rates of interest are likely to affect the value of the Scheme's holdings and consequently the value of the Scheme's Units. The Scheme may use derivative instruments such as Interest Rate Swaps, Forward Rate Agreements or other derivative

instruments for the purpose of hedging and portfolio balancing and trading, as permitted under the Regulations and guidelines. Usage of derivatives will expose the Scheme to certain risks inherent to such derivatives. There is risk of capital loss.

**Sundaram Corporate Bond Fund:** Changes in general market conditions, Government policies / laws, and factors impacting capital/ debt/ money markets in particular, as also changes in level of interest rates, trading volumes, liquidity, market volatility, and settlement/ trading procedures may affect the value of scheme's investments and consequently the NAV of the scheme. Variations in prevailing rates of interest will impact the value of scheme's investment in debt/ money market securities and hence the NAV of the scheme. Debt securities are subject to credit risk, which means that the issuer of the security may default in meeting the obligations under the security. Securities which are not quoted or thinly traded on the stock exchange carry liquidity risk. Investments in debt securities are subject to reinvestment risk as, due to non-availability of appropriate securities, sometimes the interest rate at which interest /maturity proceeds of such securities are invested may fall. Risk associated with securitised debt is similar to the listed factors. Risk Factors - Equity Markets: Stock Market Volatility, Equity Price Risk, Dependency Risk, Temporary Investment Risk and Non-Diversification Risk and Concentration Risk, to name a few. Sundaram Short Duration Fund: • Interest rate risk • Derivative risk • Capital loss risk • Credit Risk • Liquidity Risk • Price Risk • The holding of a cash position and accrued income prior to distribution and accrued expenses. • Disinvestments to meet redemption, recurring expenses, IDCW payout etc. • Segregated portfolio may be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA) which involves Liquidity Risk & Credit Risk etc. For detailed scheme-specific risk factor refer the respective Scheme Information Documents.

**Sundaram Diversified Equity and Sundaram Tax Savings Fund:** The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant. In view of the same, the trustees have the right in their sole discretion to limit redemptions (including suspending redemptions) under certain circumstances or unusual market conditions including stock market closure (otherwise than for ordinary holidays), unforeseen circumstances where disposing assets of the scheme is not in the best interest of unitholders, extreme volatility of markets or if so directed by SEBI. • Investment in ELSS is subject to lock-in period of three years. During this period investors will not be able to redeem their units. To this extent the liquidity for the investor is restricted and this may restrict exit at opportune moments. • Varying levels of liquidity, higher volatility, lower levels of transparency, management bandwidth, difficulty in accessing funds and technology, low entry barriers, higher impact costs, risks specific to unlisted companies and changes in government policies, to name a few, are key factors that may impact the performance of and liquidity in the Scheme. The names of the schemes do not in any manner indicate either quality or future prospects and returns.
